

Actium™

**A contemporary multilingual
sans serif typeface developed
to help *perfect typography*
*automatically.***

Smart Capo™

An OpenType feature

developed for Actium™

Are you constantly making manual adjustments to your typography – despite the sophisticated layout programmes and typefaces available today?

A particular issue that has drawn our attention are the problems of using capital letters and numbers together. When capitals are combined with old-style numerals such as WD40, U2 and H1N5 they jump out of the text. They sit awkwardly together as the numerals have been designed to work with the lowercase not the uppercase letters.

Our solution is ‘Smart Capo’ – an OpenType feature we developed for Actium, that automatically activates once you type an uppercase letter together with a number. The numerals and capitals switch to mid-height versions that were designed to sit comfortably next to each other, such as WD40, U2 and H1N5. An additional benefit is that, next to perfecting alphanumeric words, capitalised words without any numbers are also automatically set into mid-capitals. This saves time for the typographer – taking the pain out of text formatting – and makes it a more pleasurable experience for the reader.

Before & After

Once you type an uppercase letter together with a number, the numerals and capitals automatically switch to mid-height versions that were designed to sit comfortably next to each other and fit well into text.

H5N1

SMART CAPO

H5N1

The Family

Actium consists of six weights in two styles, making a dozen fonts. Weights range from light to black in roman and true italic.

Don Vito Corleone was a man to whom everybody came for help, and never were they disappointed. Only one thing was required. That you proclaim your friendship. And then, no matter how poor or power-

Flexibility

Actium comes equipped with different weights and styles to allow for several levels of hierarchy or subtle emphasis in sections of your text. You can rely on Actium to help get your message across.

What manner of men are we, if we do not have our reason? *Let me say that we must always look to our interests.* We are all men who have refused to be fools, who have refused to be puppets dancing on a string pulled by the men on high. **We have been fortunate here in this country.** We will manage our world for ourselves because it is our world, *cosa nostra*. And so we have to stick together to guard **against** outside meddlers. Otherwise they will put the ring in the nose of all the millions of Neapolitans and other Italians.

Actium boasts an extended Latin character set and a Greek. That means a wide range of Western languages are supported: perfect for use in bilingual publications and packaging.

German

Ein U-Boot ist ein boot, das für die unterwasserfahrt gebaut wurde. Moderne große U-Boote, die eine masse von bis zu 26.000 tonnen haben können, werden auch U-Schiffe genannt. 1850 ließ der bayerische Artillerie-Unteroffizier Wilhelm Bauer das erste in Deutschland gebaute U-Boot, den sogenannten Brandtaucher, zu Wasser. Für die fahrt über wasser können im prinzip alle antriebe verwendet werden, die für schiffe in frage kommen. Gewöhnliche schiffsaggregate (dieselmotoren, gasturbinen) sind verbrennungsmotoren und benötigen große mengen sauerstoff für den verbrennungsvorgang, der bei überwasserfahrt in der luft zur verfügung steht. Grundsätzlich gilt, dass ein U-Boot um so schwerer zu lokalisieren ist, je kleiner und leiser es ist. Dieselelektrisch betriebene U-Boote haben deswegen im getauchten zustand oft vorteile gegenüber den

Latvian

Dators ir iekārta, kas apstrādā datus pēc iepriekš definētas procedūras. Datori ir konstruēti no komponentiem, kas veic vienkāršas, iepriekš noteiktas darbības. Šo komponentu savstarpējā saziņa ļauj datoram veikt informācijas apstrādes procesus. Pareizi sakonfigurēts (ieprogrammēts) dators spēj risināt noteiktas problēmas, kā arī būt lielākas sistēmas sastāvdaļa. Pareizi sakonfigurētām datoram padodot ievaddatus, programma tos apstrādā, un dators spēj atrisināt problēmu vai prognozēt sistēmas uzvedību. Tiek pētītas iespējas izmantot datorikā bioloģiskās DNS. Pirmie datori bija tīri mehāniski. 1930.-tajos gados telekomunikāciju industrija parādījās reļeji, bet 1940.-tajos gados jau tika uzbūvēti pirmie tīri elektroniskie datori izmantojot radiolampas. 1950.-tajos un 1960.-tajos gados tās tika aizstātas ar tranzistoriem, bet 1960-to gadu beigās un

Mađarski jezik je službeni jezik Republike Mađarske, kao i Autonomne Pokrajine Vojvodine te dijelovima Republike Slovenije (okolina mjesta Lendava, u istočnoj Sloveniji). Pored toga, mađarski se govori i u dijelovima Rumunije, Slovačke, Ukrajine, Hrvatske i Austrije, ali u njima ne uživa status službenog jezika. Pripada finougarskoj grupi uralskih jezika. Njime govori 14,5 miliona ljudi. Pošto je mađarski jezik službeni jezik Mađarske, on je istovremeno i jedan od službenih jezika Evropske Unije. Mađarski jezik specifičan je po tome da ima veliki broj padeža (lingvisti se ne slažu oko tačnog broja, ali smatra se da ih ima barem 24). Imenica ház koja znači kuća poprima oblik házból u značenju iz kuće, házban u značenju u kući, házba u značenju u kuću, házról u značenju sa kuće, házon u značenju do kuće, házra u značenju prema kući, itd. Komplexnost mađarske gramatike doprinosi i činjenica da mađarski ne poznaje

Norwegian

Brød er ein type attåtmat laga av deig som er blitt steikt eller damp. Det finst ei rekke ulike brødslag frå heile verda. Dei kan etast varme som kalde, vera ferskvarer som varer ein dag eller tola langvarig lagring. Ein kan laga brød av så lite som mjøl og vatn, men salt høyrer òg som regel med, og andre vøsker kan brukast. Ein kan bruka mjøl frå ein type korn eller fleire. Kveite er eit særst vanleg kornslag til å laga brød av, ettersom det har eit høgt gluteninnhald som gjer at det lett heng saman. Brød kan òg lagast av til dømes rug eller mais som einaste kornslag. Frø, nøtter eller krydder kan brukast for å setja smak på brødet. Feittstoff, egg og honning er andre ting ein kan ha i brøddeigen. Mange brød hever ved hjelp av eit stoff som utvikler gass i brødet, kan henda

French

Le pain est un aliment de base dans de nombreuses sociétés humaines. Il est fabriqué à partir de farine, de levure ou levain, de sel et d'eau. La pâte du pain est soumise à un gonflement dû à la fermentation, c'est ce qui caractérise le pain par rapport à la galette. La farine provient principalement de céréales panifiables: blé et seigle. On peut y adjoindre, en quantité modérée des farines d'autres provenances: autres céréales (orge, maïs), châtaigne, noix. De la pâte à pain sans levain aurait été oubliée, se serait «gâtée», mais aurait tout de même été cuite, permettant la découverte du pain avec levain. C'est en Égypte qu'on a retrouvé les plus anciennes représentations de pain. La fabrication d'un

Greek

Το υποβρύχιο είναι είδος σκάφους που έχει τη δυνατότητα να κινείται επί και υπό την επιφάνεια της θάλασσας. Προσπερνώντας τις διάφορες απόπειρες, από την αρχαιότητα, κατασκευής υποβρυχίων που όμως δεν τελεσφόρησαν λόγω τεχνικής ανεπάρκειας, τα πρώτα υποβρύχια κατασκευάστηκαν τον 17ο και τον 18ο αιώνα και έμοιαζαν περισσότερο με μεταλλικούς κώδωνες που φιλοξενούσαν συνήθως ένα άτομο και στηρίζονταν για την κίνησή τους στη μυϊκή του δύναμη. Σήμερα τα υποβρύχια χρησιμοποιούνται κυρίως για στρατιωτικούς και ερευνητικούς σκοπούς αλλά και για αναψυχή καλούμενα συνήθως βαθυσκάφη. Στις 7 Σεπτεμβρίου 1776, στη διάρκεια του πολέμου της ανεξαρτησίας των,
