AN OVERVIEW OF OPENTYPE LAYOUT FEATURES

OpenType layout features provide the user with integrated access to certain typographic refinements — like small caps, alternate figure styles, or stylistic variants — without changing fonts or disrupting the underlying text encoding. Note, however, that some features may not be accessible or supported in all applications. Please consult your software's user guide for details.

The CONDOR OpenType fonts include the following features:

CASE PUNCTUATION – When ALL-CAPS styling is applied, parentheses, brackets, braces, dashes, guillemets, and mid dot are replaced with shifted forms.
