CONTEXTUAL ALTERNATIVES

To use contextual alternatives, you will need to use an application that is OpenType-savvy. Some OpenType-savvy applications include the newer versions of Adobe Creative Suites, QuarkXPress, TextEdit, Keynote, Pages, Microsoft Word and CorelDRAW. *Please make sure any application you intend to use the OpenType features within this font is OpenType-savvy and supports Contextual Alternatives.*

If you want the application to automatically rotate through the variations, you will need to turn on the *Contextual Alternatives* option in the OpenType window within the application.
