AQUUS

DISPLAY FONT FAMILY

BY PHOSPHO

AQUUS is a contemporary all-caps display font that refines the elegance of a classic Didone with experimental interventions. Geometric elements and subtle details are found in its letters, many of which connect to ligatures. Most alternate glyphs can be switched automatically by use of the Stylistic Set function in OpenType-supporting applications, others you can access manually via the glyphs palette.

You may try **AQUUS LINEARIS** as a fashionable outline variant, which reveals its beauty especially when combined with imagery. Use them best for concise strings of characters, such as logotypes, packaging or magazine titles.

AQUUS SIMPLEX is their sober companion, based on the same letterforms, minus the geometric ornaments and conjunctions.

Designers: Roland Hörmann, Felix Auer
