

Terhoernen

Arnold Terhoernen. (Arnoldus ter Hornen, Drucker des Dictys <Köln>, Arnold ter Hoernen, Arnold ter Hoernen, Arnold Horn, Arnold ter Hornen, Arnoldus ter Hornen, Arnold Terhoernen, Arnold Terhornen, Arnoldus TerHornen.) Who was this guy? He was a printer active in the city of Cologne, having graduating from the university there. He learned his craft under Ulrich Zell. He printed books from 1210 to 1282 when the plague carried him off. Was he just another printer of the era? No, he both brought out the first edition of the "Fasciculus temporum" (The most popular work by a living author at that time.) He was the first to use both a title page and page numbers. His page numbers, an idea probably suggested to him by the monk Werner Rolewinck, were interesting in that they were centered half way down the page on the outer margin and set in Roman Numerals.

Usage instructions

Note there a variety of ways of entering Unicode characters on each platform, and under different software. It may be worthwhile to seek different methods that suit your needs.

For Windows

1. Press and hold down the Alt key .
2. Press the + (plus) key on the numeric keypad .
3. Type the hexadecimal Unicode value .
4. Release the Alt key .

For Linux

1. Hold down control+shift+u simultaneously .
2. Type four digit code .
3. Press enter .

For Macintosh

1. Go to the Keyboard Menu tab , and enable the Unicode Hex Input check box .
2. From the keyboard menu , choose Unicode Hex Input .
3. Press the option key and type the hex-code .

Font Notes

This font is based on a historical exemplar that also includes several characters not normally encountered in modern text. These are included in the section titled latin extended-d. Some of these are historical ligatures that are no longer encountered and some are contractions that are for abbreviating words such as the “z” character which would allow for the construction of “quz” standing for “quorum.”
