MONOSPACED BUT NO MONO SPACE

Created from 2002 to 2007 this font family is influenced by fonts like *OCR-B*, *DIN* and the work of *Erik Spiekermann*. Newsletter is not a real mono-spaced font but has the **ease of recognition** these fonts have – even though these fonts are often criticized for their aesthetic qualities. Newsletter has a computer-related impression but is more **legible and aesthetic** than real monospaced fonts are.

Since 2006 Newsletter is the corporate font of the design agency »die Typonauten«. It is eminently suitable for **correspondence use**. After a testing period and fine tuning it is now published.
