Ink Gothic is a contemporary slab serif with a split personality - a mix of heavy industrial with a light typographic twist. Unique letterforms designed by Brian Jaramillo evolve the typeface into a unique class all its own.

ITALIC

Ink Gothic Italic is a cross between a true italic and an oblique style, mixing the forms without regard to typographic rules. The result is an unusual dynamic that draws attention to the typeset message and tries to create a visual amusement & curiosity.

HALLELUJAH!

Ink Gothic Bold borders on a poster display weight, taking the contemporary slab serif into the more Industrial side of the typeface. Creative license in the manner in which the letters are weighted bold only help accent the playfulness of the letterforms.

A remarkable but poor forgery

it would behoove you to reconsider your bad day job

KNOCK IT OFF

Ink Gothic 3D takes the original letterforms of Ink Gothic to a high end poster style reminiscent of the Rolling Stone magazine logotype as well as antique stocks and currency, while still maintaining its more modern flair. Its another perfect compliment to the standard Ink Gothic typefaces. V&T 2008

INKED

Ink Gothic Inked takes the original clean letterforms and distresses them to recreate an overinked type letterpress effect. Even with the grunge look, the typeface maintains a high degree of legibility, making it a perfect perfect compliment to the original Ink Gothic typeface.
