Designed and Programmed

by

*Manuel
Corradine*

2009

Rock and Cola's design is clearly inspired by the sinuous shapes of the world's most famous drink's logo.

It however does not pretend to copy it faithfully or to serve as a platform to generate the logo itself.

Rock and Cola is a very elegant Script font with great weight and contrast. Its Open Type features include ligatures, swashes, alternative characters, ornaments and accents in order to support many foreign languages.

It has huge possibilities for application in logos, titles and short texts by generating in them great impact and recalling.

*Use **Rock and Cola** in your projects and enjoy it!*

"y" from Rock and Cola Ends

or using the feature 

Caution

Rock and Cola Pro font was programmed to obtain the best ornamental results so it contains automatic corrections to the wrong combinations of some swashes, alternate characters and ligatures. Then the Open Type application doesn't allow to generate all possible changes of characters in the selected feature.
