Ivory™ two-colored initial guidance

With Ivory you can easily design two-colored headlines in three steps.

Please note: you will want to be working in an application that offers layering options. Such applications would be Adobe Photoshop, Indesign and Illustrator, CorelDRAW, or Quark, for example.

1. choose „Ivory-NoSwashes“ for your two-colored text

IVORY

Ivory-NoSwashes

2. duplicate the text-layer and choose „Ivory-Swashes“

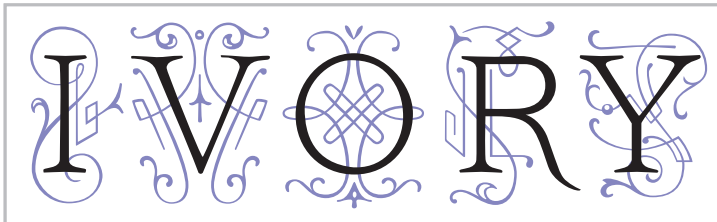

IVORY

Ivory-NoSwashes

Ivory-Swashes

3. place one layer congruently above the other. Done!
