**APHRODITE SLIM PRO IS MULTILINGUAL & HAS A PLUS**

Aphrodite Slim Pro was designed for everyone in this wonderful planet.

We are proud to present a typography which not only ligates in a magnific way the words of the most spoken languages over the world but it also has a plus:

Aphrodite Slim Pro was thought to be a font which really decorates what you write in order to achieve never seen results. That's why we have taken into account a feature that ligates/decorates words when they are followed by an space. This will give always new characters over the sentences.

Open Type possibilites are huge, and we, the typeaholic designers, promise that Aphrodite Pro could never let you down.
